DETAILED ACTION

Claim Status

1. Claims 32-39 have been added as filed on 1/24/08.
Claims 11, 14-17, 20-22 and 24-29 have been canceled as filed on 1/24/08.
Claims 1-10, 12, 13, 18, 19, 23 and 30-39 are currently pending.

Claim Amendment

2. Applicant's election with traverse of Group I invention (claims 1-7) is acknowledged. Applicant's traversal will be addressed in the subsequent Office action on the merits.
3. Applicants have amended the instant claims and added new claims that are drawn to a number of distinct species. Thus, an additional Species Election requirement is set forth below. Applicants are requested to elect according the requirements as set forth below.

Additional Species Election

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicants are requested to further elect **a single ultimate species for each** of the following:

- a. A single specific species of "self-assembly moiety" (selected from "an oligonucleotide", "a ligand" or "a peptide") comprised by the chemical compounds. (For

Art Unit: 1639

Group I; e.g. claims 1, 32 and 33). If applicants elect “a ligand” as the “self-assembly moiety”, applicants are further requested to elect a single specific species of a “ligand” (e.g. “dipyridyl”).

b. A single specific selection of a chemical compound either with **OR** without “a linking portion”. (For Group I; e.g. claim 5).

The species lack the same technical feature, because they do not share a common core structure and/or function. The different species would also differ in their reactivity and the starting materials from which they are made. For examples, the different species of “self-assembly moieties” can be various compounds such as DNA and Proteins, which species do not share the same core structure and/or do not have the same function. Consequently, the species have different issues regarding patentability. Thus the unity of invention between each species subgroup is lacking.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1639

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Please see the above species selection for correspondence between the claims and the species selection.

The following claim(s) are generic: 1-10, 12, 13, 18, 19, 23 and 30-39.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1639

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
